## Plan your next D.I.Y. project right from the start.

These Build It D.I.Y. brochures have been compiled especially for you to help you through every step of your home D.I.Y. projects.

We've given you expert advice on what materials you'll need and step-by-step instructions on how to get the job done right, first time.

Please feel free to visit any of our stores and speak to one of our consultants on advice about your projects.

We say **Yes** to getting the job done right

Learn how to choose the right generator for **your** needs

## How to choose a Generator

## MAINTENANCE AND SAFETY TIPS

- Before starting your generator, always ensure that there is sufficient oil and fuel in the machine. Only use SAE30 graded oil and unleaded petrol (for petrol models).
- Do not use dirty fuel or oil in your generator.
- Always place your generator on a flat surface when pouring in the oil and fuel.
- If you have an electric start generator, check that your battery is fully charged before starting.
- Ensure that the choke is on when starting your generator, once started, switch the choke to 'off' position.
- Never connect your appliances before starting your generator, always start your generator first, and then connect one appliance at a time.
- Disconnect your appliances before switching off your generator.
- Switch off the fuel tap prior to turning off your generator, to allow the fuel in the carburettor to be used.
- We recommend that your first service should be after 20 running hours and thereafter at 50 hour intervals.
- Always operate your generator in a well ventilated area, as toxic fumes are emitted from your generator.

## HOW TO CHOOSE A GENERATOR

### 2.2KVA - 2200W

### 7.5KVA - 7500W
